Release Notes

Changes in v11.0.3

Released November 14, 2022

ID	Function	Description
MARS-2870	CMA	Fixed: Some system-level CMA configurations could get in a state where fields on the Subject Property page could not be reordered by an admin.
CORE-2494	Email	**11.0 Only -** *Fixed in 11.0.3.2:* When emailing a listing display/report as a PDF, checking the "Bcc me a copy of this message" option did not result in a copy of the email being sent to the agent.
CORE-2481	Media	**11.0 Only -** Fixed: Listing images an agent uploaded but deleted before submitting could still end up being attached to the listing.
MAPI-173	Media	**11.0 Only –** *Fixed in 11.0.3.2:* Agent photos uploaded within Add/Edit did not update the Photo Count for that roster record, causing the photo to not appear on displays.
CORE-2419	Search	**11.0 Only -** Fixed: Saving a custom display in the new search with an apostrophe in the name prevents being able to later delete that display.
CORE-2457	Search	**11.0 Only -** Fixed: Saving a new "3 panel search" as a Saved Search errors if later run from the "My Favorite Searches" widget on the home page.
	System	Several previously static network variables used by Matrix can now be configured to support an enterprise-wide infrastructure change being made by CoreLogic.
